

Americare™

April 30, 2014

To whom it may concern:

I am writing this letter on behalf of Americare, of which I have led our development team for the past 10 years. Our company typically spends about \$25,000,000 annually on new construction. In two of our most recent projects, we have used an innovative drywall tape system from Green-Zip. It allows for a very efficient demounting of our wall systems should the need arise.

The tax benefit makes the Green-Zip product a financial no brainer for our company going forward. We plan to use the Green-Zip product on all of our new buildings. Our contractors have had no issue in using the product. We feel there really is no downside to using this product if you want to save money and have an efficient remodel in the future.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Henley Montgomery', written over a horizontal line.

Henley Montgomery
Senior Vice President of Development
